

## ADMON

### General Information

Information administration and management is an increasing part of every organization. Companies must have an up-to-date overview of available information technology and solutions at any time. This ensures economical and efficient information processing and its integration with business requirements and objectives. Professional management consultancy, built on knowledge and experience, is essential when dealing with this important and expensive part of today's business operations. This is Admon's strength.

### The company

Admon is a consulting company focused on management issues, built on its consultants' knowledge and extensive experience in management in the information technology (IT) industry. Owners are Arnaldur F. Axfjörð MSc, Halldór Pétursson Phd, Runar Karlsson BA., MSc. and Svavar G. Svavarsson BSc.

Admon offers independent consulting with emphasis on IT strategy, IT architecture and IT management. Admon supports its customers in focusing on profitability and trust by streamlining IT operations, managing security and administering efficiency.

Admon's consultants have extensive experience in IT management and services and emphasise professional advice respecting trust and confidence.

Admon supports its customers by improving their operations and providing overview and expertise in IT solutions supporting optimum IT services in line with the overall vision and strategy of the company.

Admon seeks to be recognised for its high quality services based on strong loyalty to its customers, emphasising the customer's benefits. The goal of the consultancy is to facilitate implementation of new methods, new technology and new ideas, supporting new directions founded on experience and expertise.

Areas of emphasis:

- IT Strategy  
Relating IT Strategy to the overall company strategy.
- IT Architecture  
Establishing standards, policies and procedures for technical infrastructure and IT operations.
- IT Management  
Review of IT management and operations to outline improvement opportunities.
- Other Consulting areas  
Range of specialised consulting, e.g. feasibility studies, security management, business recovery plans, electronic business, project management, contracts, tenders and IT budget planning.

The consultants at Admon are all former managing directors in various companies in the IT industry with more than 10 years of experience in IT prior to joining Admon.

The CEO of Admon is Halldór Pétursson , hp@admon.is.
